## Pitch My Etude

---

### Problem Description

You are in a job interview at a big tech company and required to pitch one of your previous projects from COSC326. Luckily you can ask your group members to support you.

---

### Task

As a group, select one étude and "pitch" it in the town hall either on **May 23** or **May 24** (according to your stream).

Your pitch presentation should include why you selected this étude and why your solution is great. You can also highlight challenges/problems and discuss how they can be solved in future work. Your pitch presentation will need to be 3 minutes or less, and will be followed by 2 minutes of questions. Due to the number of groups, these times will be strictly enforced.

---

### Standards

For an achieved standard you need to make the pitch.

Merit criteria include a well-structured and engaging pitch and the ability to answer questions about your étude clearly and with confidence.

Excellence criteria include a pitch that is exceptionally clear, engaging, and well-structured, and the ability to answer questions about your étude with confidence and insight.

---

### Objectives

1.3, 1.4, 2.4, 4.1, 4.8, others depending on the étude chosen.

(Group)
